Easy to use anywhere

Manually downloading data from digital tachographs are a thing of the past! All data from **driver cards** and **tachographs** are **downloaded, archived and analysed** fully automatically.

This **works anywhere**, regardless of where your vehicles or drivers are.

Setting up the **card reader** is **easy**. The **integrated touchscreen** guides you comfortably through the initial setup. User interaction during operation not required!

Always Up-to-date & Data Protection Compliant

With our **secure data transmission**, you have all the **latest data files** from driver cards and vehicle tachographs at your fingertips at any time.

All communication channels are **fully encrypted** and data is stored in **data protection compliance**. Separate **backups** and controls **safeguard** against accidental loss adhering to all legal requirements for the storage of tachograph data.

Export of the data, either **individually** or packaged as a **ZIP file** are available for spot checks for further processing in other systems, if desired.
